

To connect from an aonl machine:

```
mysql -u triton -p -h halladb triton
```

Code used to create current table

```
CREATE TABLE EXPrunlist(  
  run_number INT UNSIGNED NOT NULL,  
  start_time DATETIME,  
  end_time DATETIME,  
  target TINYTEXT,  
  raster_x FLOAT(3,2),  
  raster_y FLOAT(3,2),  
  beam_energy FLOAT(10,4),  
  momentum_setting FLOAT(10,10),  
  angle FLOAT(8,6),  
  prescale_1 INT UNSIGNED,  
  prescale_2 INT UNSIGNED,  
  prescale_3 INT UNSIGNED,  
  prescale_4 INT UNSIGNED,  
  prescale_5 INT UNSIGNED,  
  prescale_6 INT UNSIGNED,  
  prescale_7 INT UNSIGNED,  
  prescale_8 INT UNSIGNED,  
  comment BLOB,  
  PRIMARY KEY ( run_number )  
);
```

In this, EXP should be replaced with an experiment tag. These will be SRC, MARATHON, EP, and EK.
