To connect from an aonl machine:

```
mysql -u triton-user -p -h halladb triton
```

Code used to create current table

```
CREATE TABLE EXPrunlist(
    run_number INT UNSIGNED NOT NULL,
    run_type TINYTEXT,
    start_time DATETIME,
    end_time DATETIME,
    target TINYTEXT,
    raster_x FLOAT(3,2),
    raster_y FLOAT(3,2),
    beam_energy FLOAT(10,4),
    momentum FLOAT(10,10),
    angle FLOAT(8,6),
    prescale_T1 INT UNSIGNED,
    prescale_T2 INT UNSIGNED,
    prescale_T3 INT UNSIGNED,
    prescale_T4 INT UNSIGNED,
    prescale_T5 INT UNSIGNED,
    prescale_T6 INT UNSIGNED,
    prescale_T7 INT UNSIGNED,
    prescale_T8 INT UNSIGNED,
    comment BLOB,
    end_comment BLOB,
    PRIMARY KEY ( run_number )
);
```

In this, EXP should be replaced with an experiment tag. These will be SRC, MARATHON, EP, EK, COMMISSIONING, PRECOMMISSIONING, and TEST.
